### **III. Design Principles implemented:**

- ❖ Offer informative feedback
  - Both the above design principles are implemented on the login page. When the user enters the right email and password then their account will be opened. But if either the password or the email is wrong they will get a feedback that their password/email is wrong and a suitable message is displayed as shown in the photo above.
  
- ❖ Prevent errors and Constraints
  - If the password/email is wrong then the login button is greyed out and the user is prevented from making unintentional errors by giving any wrong inputs.

### **IV. Details of interaction styles implemented:**

- ❖ Form fill-in is used to collect login/signup data.

## **6. User Profile**

### **I. Functionality**

The user who has logged in and made an account with our website, can see their profile page.

The user can see their about section, view their followers and the people they are following, post a video, photo, gif etc, whatever they like. On the left hand side, there is a panel to view their activity on our site. They can see their blogs, posts, subscriptions, orders, wallet, comments, likes, drafts, addresses, wishlist, events and notifications.

So this functionality can be viewed as a hierarchy where the goal is to make the profile page and the subtasks would be to design the following pages:

- Blog comments
- Blog Likes
- My addresses

- Events
- My wishlist
- My account
- Notifications
- Settings

## II. Photos of implementation

- **Profile page**

The user can add anything they like in the about section.

The screenshot shows a user profile page for 'gandhiyashvi57'. On the left, there's a sidebar with a placeholder profile picture, the username 'gandhiyashvi57', and follower counts (0 Followers | 0 Following). Below this is an 'Edit' button. To the right, the main content area is titled 'About' with the placeholder text 'Share something about yourself...'. There are several icons for file types (Image, Video, Document, GIF, etc.) above a text input field. At the bottom right are 'Discard' and 'Publish' buttons, with 'Unpublished Changes' written below them.

- **Notifications page**

If there are any notifications then they will be shown here.

The screenshot shows a notifications page. On the left, there's a sidebar with a placeholder profile picture, the username 'gandhiyashvi57', and follower counts (0 Followers | 0 Following). Below this is a 'Profile' button. To the right, the main content area is titled 'Notifications' and displays a message: 'No Notifications Yet' followed by the text 'Make comments, like posts or follow members to get things going!'. There is also a small bell icon.

- **Blog Comments page**

This page contains the comments which the user may have posted on any posts.

The screenshot shows a user profile on the left with the name "gandhiyashvi57", 0 followers, and 0 following. Below the profile are links for Profile, My Subscriptions, My Wallet, Blog Comments (selected), and Blog Likes (1). To the right, a large box titled "Blog Comments" displays the message "I Haven't Made Any Comments Yet" with the sub-instruction "Check back soon."

- **Blog likes page**

The posts which the user likes will be displayed on this page.

The screenshot shows a post titled "Blog Likes" featuring a vibrant salad with various vegetables like carrots, cucumbers, and tomatoes, garnished with cilantro. Below the image, a user profile picture and the name "nayanogarwala" are shown, along with the timestamp "2 days ago · 1 min". The post content reads "Delicious recipes by the members".

- **My addresses page**

Address of the user will be shown here. Right now there is no address added by the user.

The screenshot shows a user profile on the left with a placeholder profile picture and the name 'gandhiyashvi57'. Below the profile are links for 'Profile', 'My Subscriptions', and 'My Wallet'. To the right, the title 'My Addresses' is displayed with the sub-instruction 'Add and manage the addresses you use often.' A message 'You haven't saved any addresses yet.' is shown above a blue 'Add New Address' button.

Adding my address after clicking on the 'Add my address' button.

A modal dialog box titled 'Add New Address' is open. It contains fields for 'First Name' (Yashvi) and 'Last Name' (Gandhi), both marked with a red asterisk indicating they are required. There are also fields for 'Company Name', 'Address', 'Address - Line 2' (Apartment, suite, floor), 'City' (Ahmedabad), and 'Country' (India). A dropdown menu for 'Region' is visible. At the bottom are 'Add Address' and 'Cancel' buttons.

After adding the address, it is displayed on this page.

The screenshot shows the 'My Addresses' page again. The newly added address 'Yashvi Gandhi, Ahmedabad, Gujarat 380009, India' is listed. Below the address are 'Edit' and 'Remove' buttons, and a checked 'Default Address' checkbox. A blue 'Add New Address' button is at the bottom.

- **My Wishlist page**

The items which the user has added to their wishlist will be shown here.

This screenshot shows the 'My Wishlist' page. At the top, there's a navigation bar with links for Home, About, Book Classes, Diet plans, Shop, Events & Workshops, Blog, Groups, Members, Contact, and a search bar. On the left, there's a sidebar with a following count of 57 and a 0 following button. The main content area is titled 'My Wishlist' and says 'View favorite products you've saved to your wishlist.' It shows two items: a 'MUSE HOODIE' priced at \$2,500.00 with an 'Add to Cart' button, and 'Herbal Green Tea' priced at \$80.00 with an 'Add to Cart' button. There are also 'New Arrival' labels next to each item. A navigation bar at the bottom allows for page navigation.

- **My Account page**

This page contains the first name, last name, email address etc details of the user.

This screenshot shows the 'My Account' page. At the top, there's a navigation bar with links for Home, About, Book Classes, Diet plans, Shop, Events & Workshops, Blog, Groups, Members, Contact, and a search bar. On the left, there's a sidebar with a following count of 57 and a 0 following button. The main content area is titled 'My Account' and says 'View and edit your personal info below.' It includes fields for 'Login Email' (gandhiyashv157@gmail.com), 'Your Community Page URL' (https://nestycgaweb.wixsite.com/home/profile/gandhiyashv157), 'First Name' (e.g., Kate), 'Last Name' (e.g., Sims), 'Contact Email' (gandhiyashv157@gmail.com), and 'Phone' (e.g., +1 415-639-9034). A note below the contact email field states 'This is the email we'll use to contact you.' At the bottom, there's a large 'Update Info' button.

### ● Settings page

Settings page contains the notifications settings where the user can turn on/off notifications of likes, comments, follows and group notifications.

The screenshot shows a 'Notification Settings' page with the following sections:

- Blog Subscription:** Receive emails about new posts and updates. Includes an 'Unsubscribe' button.
- Blog Notifications:** Email Notifications toggle switch (off).
- Likes:** Notify me when members like my posts and comments. Toggle switch (off).
- Comments:** Notify me when members comment on my posts. Toggle switch (on).
- Follows:** Notify me when there are updates about members I follow. Toggle switch (on).
- Group Notifications:** Email Notifications toggle switch (off).
- General:** Notify me when there is new activity. Toggle switch (on).

### ● Events page

When the user registers for any event, the details of the event will be shown here.

The screenshot shows an 'Events' page with the following content:

- A header navigation bar with links: About, Book Classes, Diet plans, Shop, Events & Workshops, Blog, Groups, Members, Contact, and a user icon.
- A sidebar menu with the title 'Events' and the sub-instruction: 'Track and manage your events here.'
- Two tabs: 'Upcoming Events' (selected) and 'Past Events'.
- A message: 'No events at the moment.' followed by a link: 'See Other Events'.

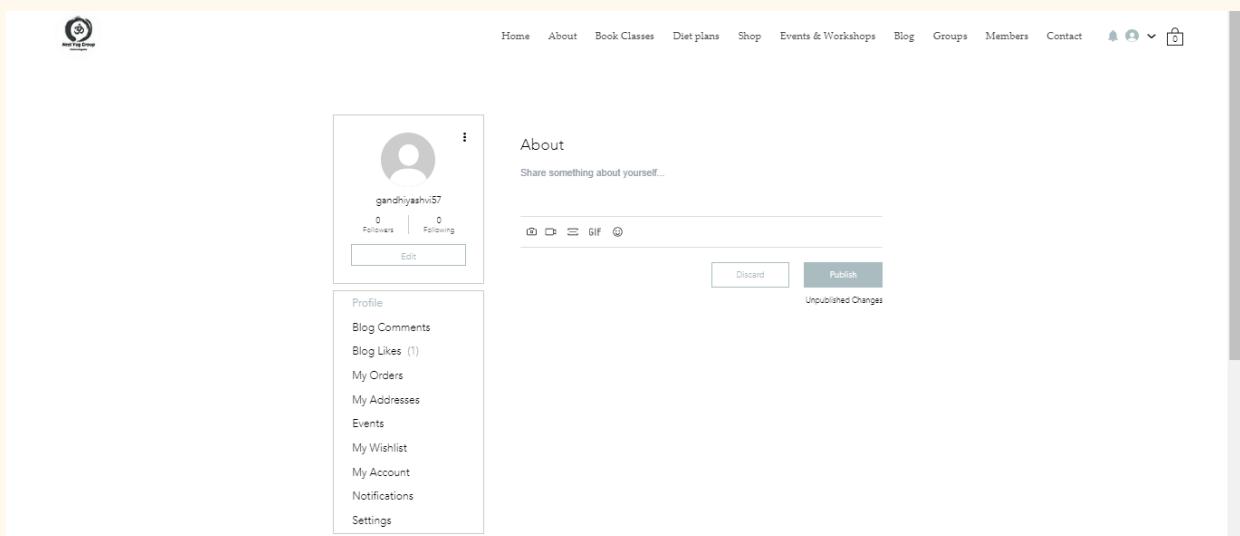

### III. Design Principles implemented:

❖ Reduce short term memory load

- Reduce short term memory load principle is implemented by wishlist page, likes page, comments page. Here the user does not need to remember what posts they liked or commented on.
- They can view them on Blog likes and Blog comments page respectively.
- They can also see their orders on My orders page.
- The items which the user likes but doesn't want to buy right away, can add them to their wishlist. My wishlist page will show all such items.
- This way there is 1 whole functionality for storing the details of the user. Users won't have any burden of remembering small things.

❖ Visibility

- In our website, on the Profile page, as we can see in the photos, there is a vertical panel on the left side for the user to go to their desired page. Thus as soon as the user visits this page, he can easily see the panel and navigate to any other page.

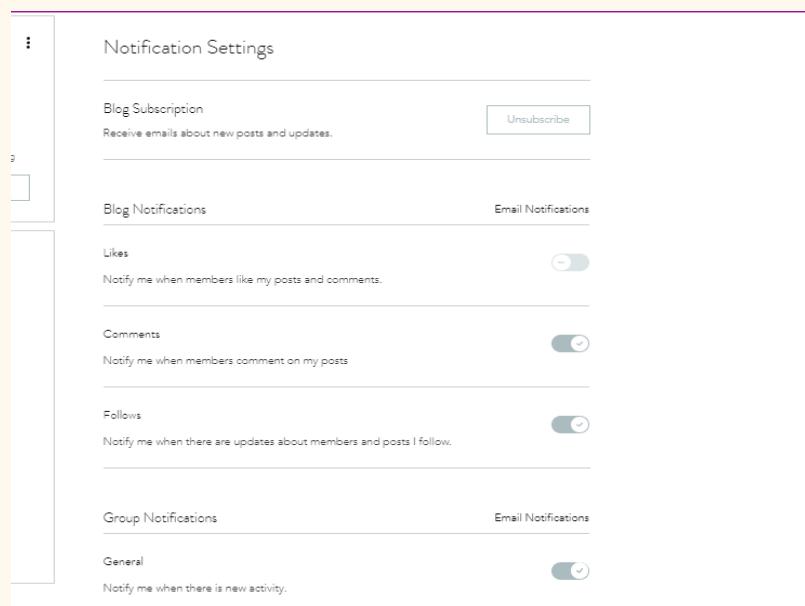

❖ Strive for consistency

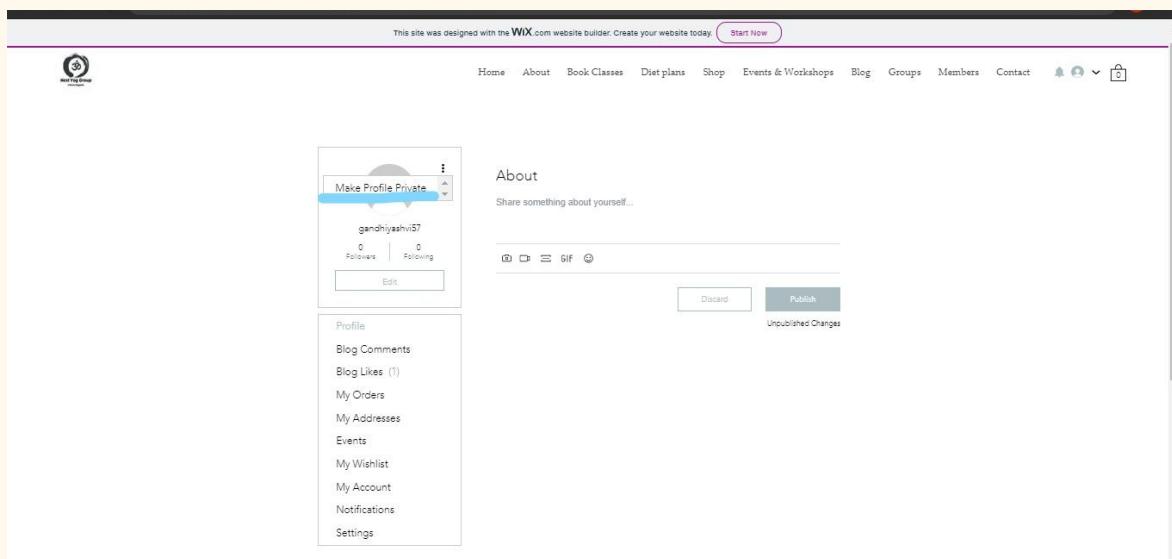

- On every page of the website, consistency is maintained in colors and fonts. Consistency is also maintained in the header as well as the footer. All the pages shown above have a consistent design format.

❖ Support internal locus of control

- The user has full control over their account. They can turn on/off their notifications for likes, comments, group notifications etc. This way they can manage their account settings.

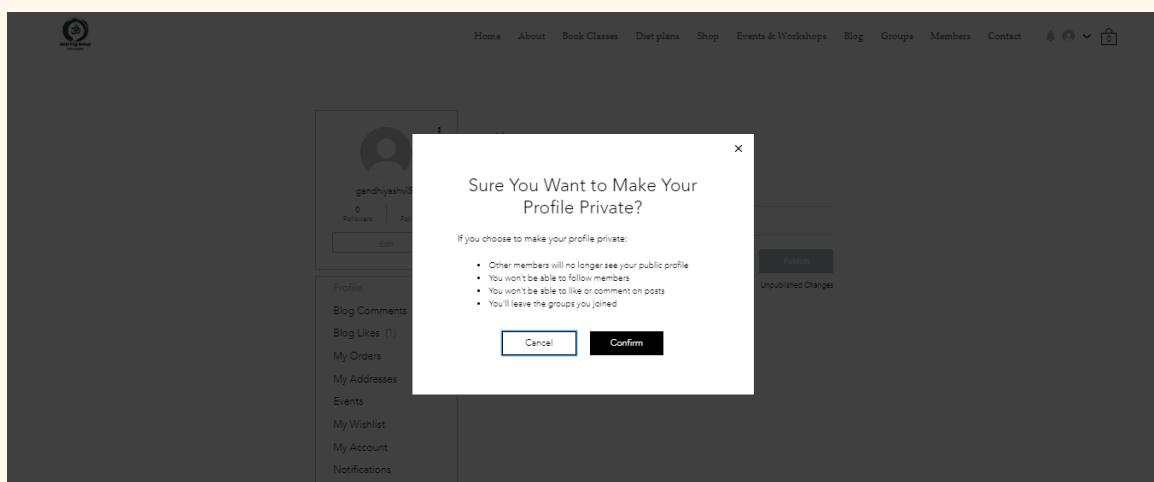

- In the profile page, the user can make their profile private if they want. Under **Universal usability**, this is an **example of Introvert vs extrovert** used in our website. Mostly if the user is introverted then they will want their account to be private while the extroverts won't.

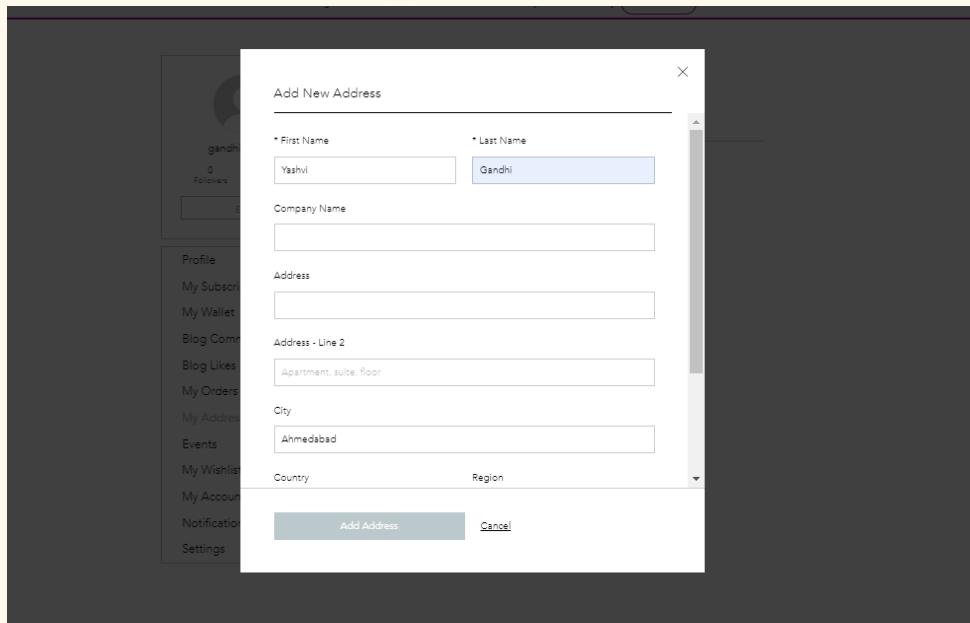

#### ❖ Prevent errors and constraints

- If the user clicks on the 'Make private profile' button, then the following dialog box will appear as below so that the user does not make any unintentional error.

## IV. Details of interaction styles implemented:

- ❖ **Form fill-in style** is used for taking the user's address. The user will have to fill out various fields like city, country, pincode etc.

- ❖ **Menu selection** is used in accessing different user centric pages.
- ❖ **Natural language** is used by the interface to communicate with user through commands.

## 7. Contact page

### I. Functionality

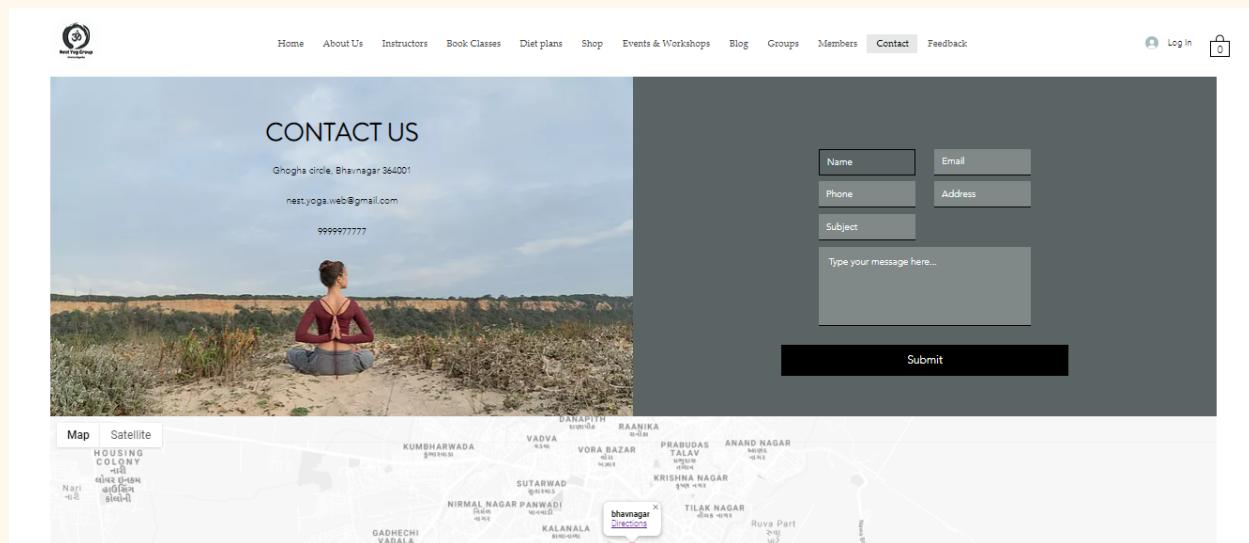

From this page, the users can contact the website owner via email, phone number, or any social media handle. They can reach out to the yoga class through any of the above mentioned ways.

They can submit their message along with their details through a form available on the page. The form has the following fields which the user needs to enter:

- Name (Required field)
- Email (Required field)
- Phone (Optional field)
- Address (Optional field)
- Subject of the message (Optional field)
- Message (Optional field)

## II. Photos of implementation

First scroll of the page which has the address and the contact number on the left side and a form on the right side for sending any message to the owner.

In the next scroll, they can see the location of the class on Google maps.

A screenshot of a Google Maps search result for "bhavnagar Directions". The map shows the city of Bhavnagar with various neighborhoods labeled in English and Gujarati. A red marker indicates the location of "NEST YOGA". The map includes standard Google interface elements like a legend, zoom controls, and a compass rose.

**NEST YOGA**

Email Address \_\_\_\_\_

Write your query here \_\_\_\_\_

Submit

They can also view the satellite view of the location.

A screenshot of a Google Maps search result for "bhavnagar Directions" in satellite view. The map shows the urban layout of Bhavnagar with roads, buildings, and agricultural fields. A red marker marks the location of "NEST YOGA". The map includes standard Google interface elements like a legend, zoom controls, and a compass rose.

**NEST YOGA**

Email Address \_\_\_\_\_

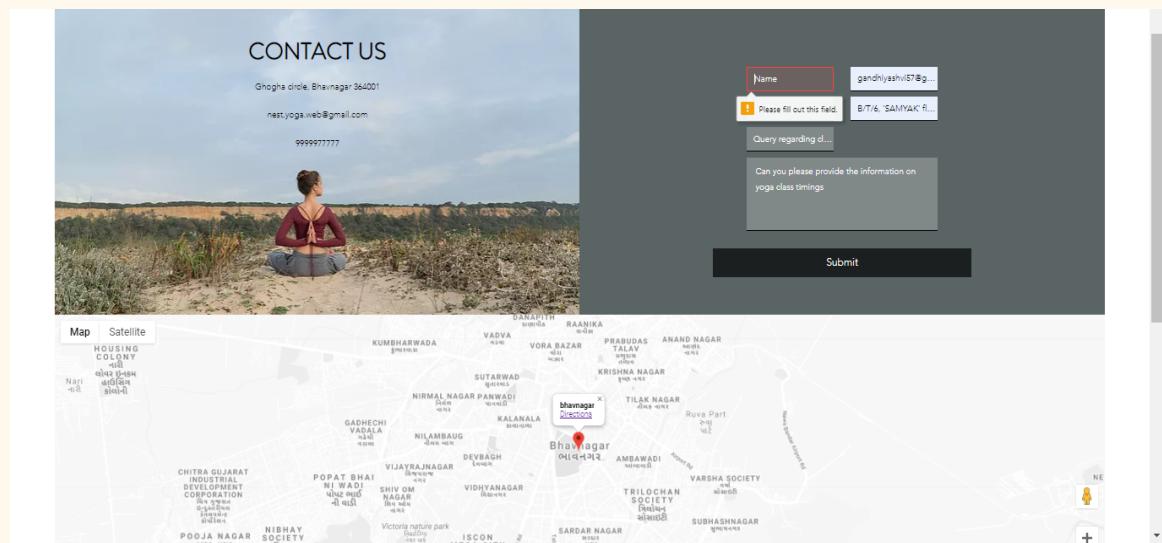

Write your query here \_\_\_\_\_

Submit

### III. Design Principles implemented:

#### ❖ Prevent errors and Constraints

- Here the 2 fields Name and the e-mail are compulsory. So if the user proceeds with hitting the submit button without adding the information in either or both of the fields, then the user is not allowed to make that unintentional error and a

suitable message “Please fill out this field” appears as shown.

- Even if the user doesn't click the submit button without entering the compulsory fields, the field which is not filled out is highlighted with a red color so that the user understands that he has missed out the required important fields.

This screenshot shows the same contact form after some input has been made. The 'Name' field now contains '123456' and is no longer highlighted in red. The 'Email' field still contains 'gandhiyashvi57@gmail.com'. The 'Query regarding cl...' field and the text area asking about yoga class timings remain as they were in the previous screenshot. The large black 'Submit' button is at the bottom right.

### ❖ Offer informative feedback

- Earlier when entering the details, the color of the button is solid black.

The screenshot shows a contact form on a website. At the top, there are navigation links: Lans, Shop, Events & Workshops, Blog, Groups, Members, Contact (which is highlighted), and Feedback. There's also a Log In link and a notification icon showing '0'. The main form area has several input fields: Name (filled with 'gandhiyashiv57@gmail.com'), Email (filled with '123456'), Phone (filled with 'B/T/6, SAMYAK R...'), and Address (filled with 'Can you please provide the information on yoga class timings'). Below these is a large black 'Submit' button. At the bottom of the page, there's a map of a city with labels for UDAIPUR, RAANIKA, VORA BAZAR, PRABUDAS TALAV, ANAND NAGAR, and KRISHNA NAGAR.

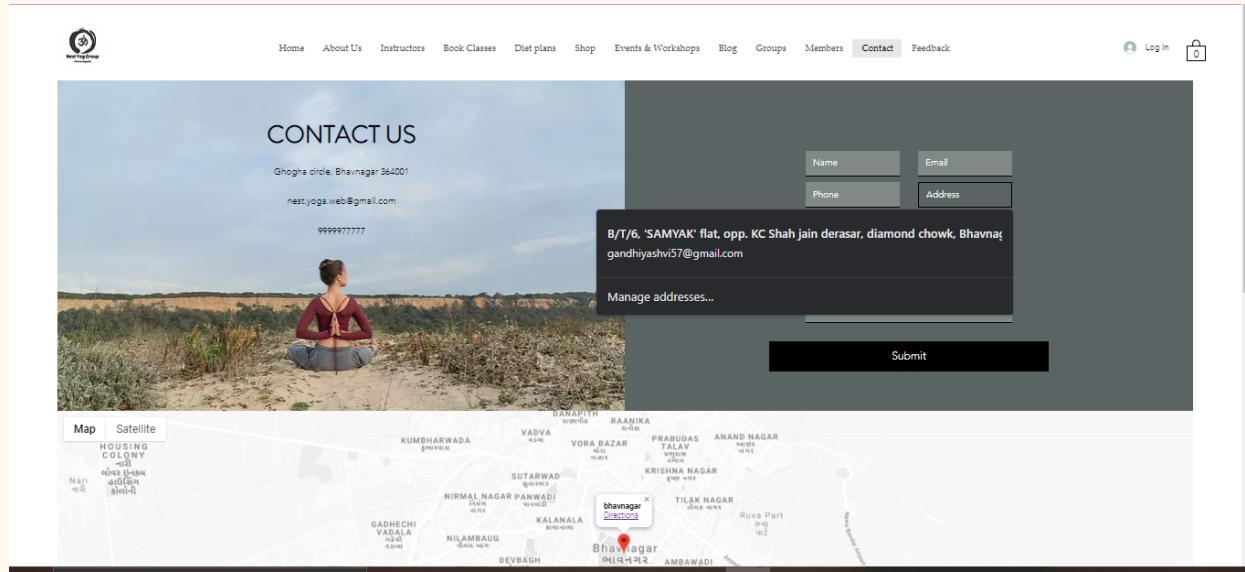

- When the button is clicked, its color changes to dark grey from solid black so that the user understands that he is going to click this button and the action is completed.
- After clicking the submit button and adding the required fields, the user will get the below feedback message “Thanks for submitting” so that they come to know that the action they did is successful and their message is been recorded.

This screenshot shows the same contact form after the user has submitted it. The 'Submit' button is now a dark grey color. Below the button, the message 'Thanks for submitting!' is displayed in a white box. The rest of the form fields and the city map at the bottom are visible.

### ❖ Reduce short term memory load

- If the user has already logged in earlier then when they are filling out the form, some details which they have entered earlier will be shown as seen in the picture

below so that they don't need to remember all the things. This way the load on their short term memory is reduced.

#### IV. Details of interaction styles implemented:

- ❖ Form Fill-in
  - The Contact Page uses Form Fill-in interaction style
- ❖ Natural language
  - Interface communicates with the user via simple commands in english.

#### V. Universal Usability principles implemented:

- ❖ Personality differences
  - On the contact page, there is a contact number available for those people who like to talk on the phone and a form is also available for any kind of transfer of message for those people who are not comfortable with talking on the phone but prefer communication via email.
  - In the form the fields 'Phone number' and the 'Address' are kept optional as many people won't like to share their number/address

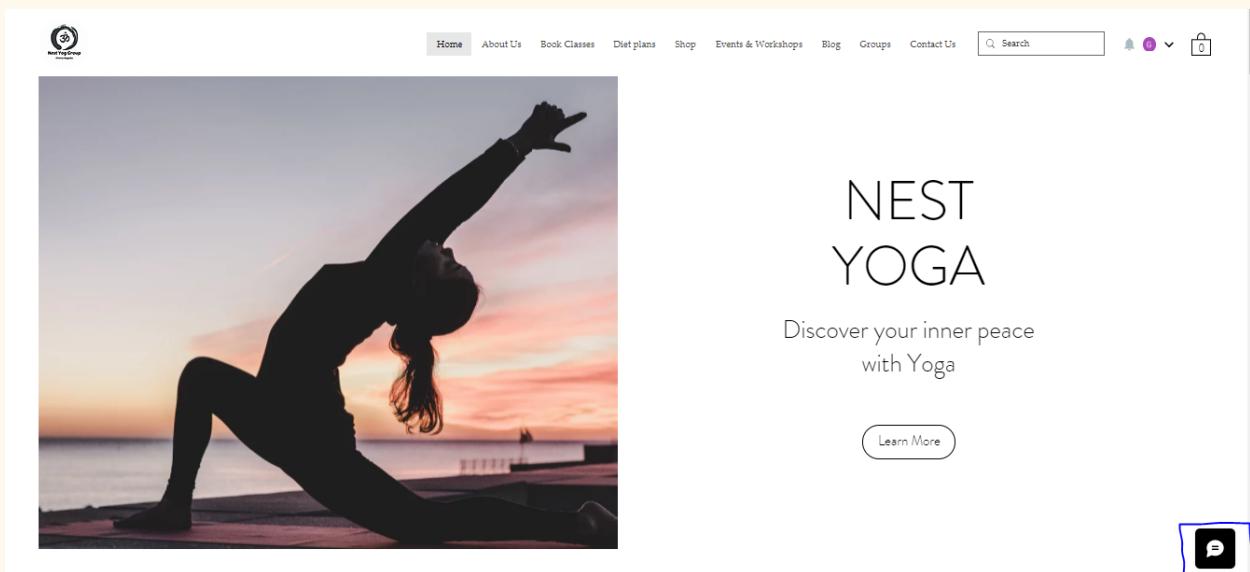

to any websites. So the fields are optional and the people who are comfortable sharing their number/address can add it in the form.

## 8. Chat Box

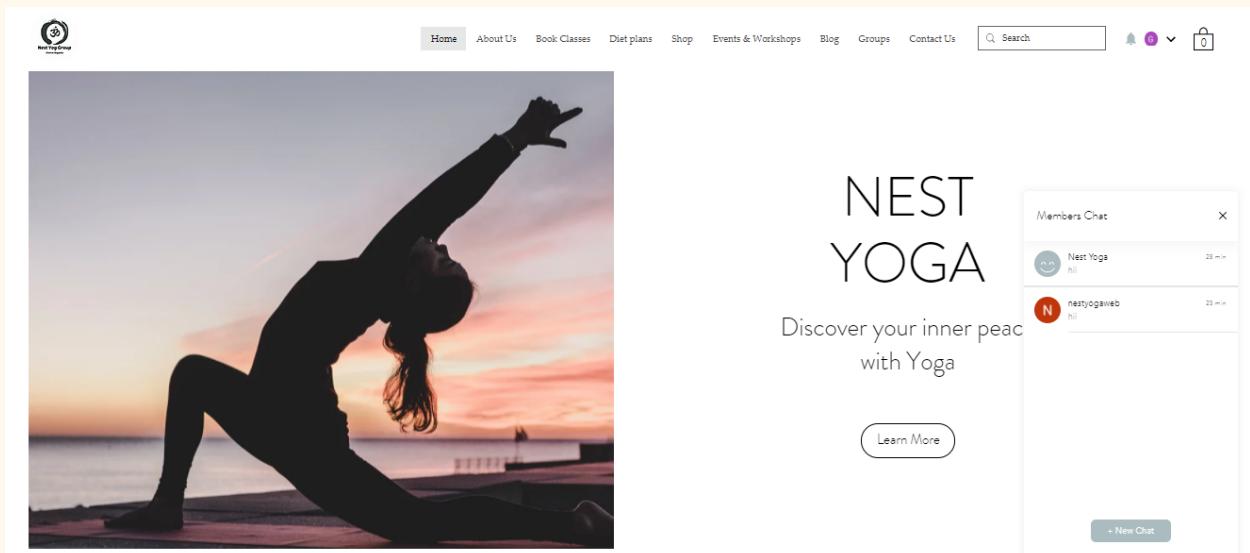

### I. Functionality:

There is a unique feature of chat for the users who want to chat either with the nest yoga owners or with other members. They have the option to choose with whom they want to chat. Users can add emojis as well in their chat. They can also attach any type of attachments(e.g. Pdf, png/jpg image, word document etc.) they want to send. The receiver can login and view their messages. If they are already logged in, they will get a notification if any new message arrives.

### II. Photos of implementation:

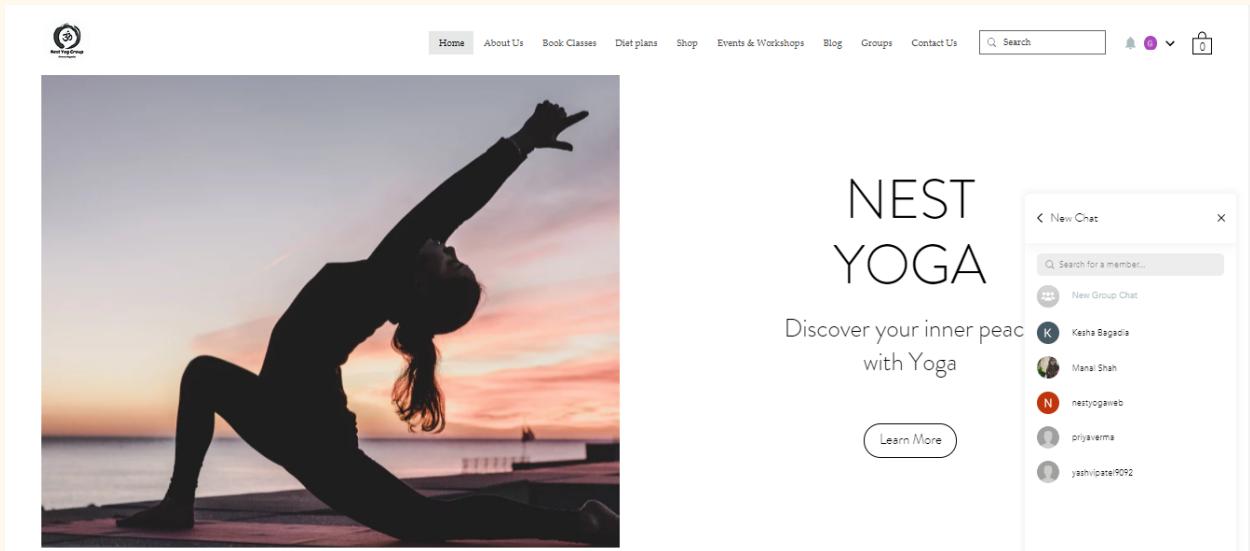

The user can view their old chats.

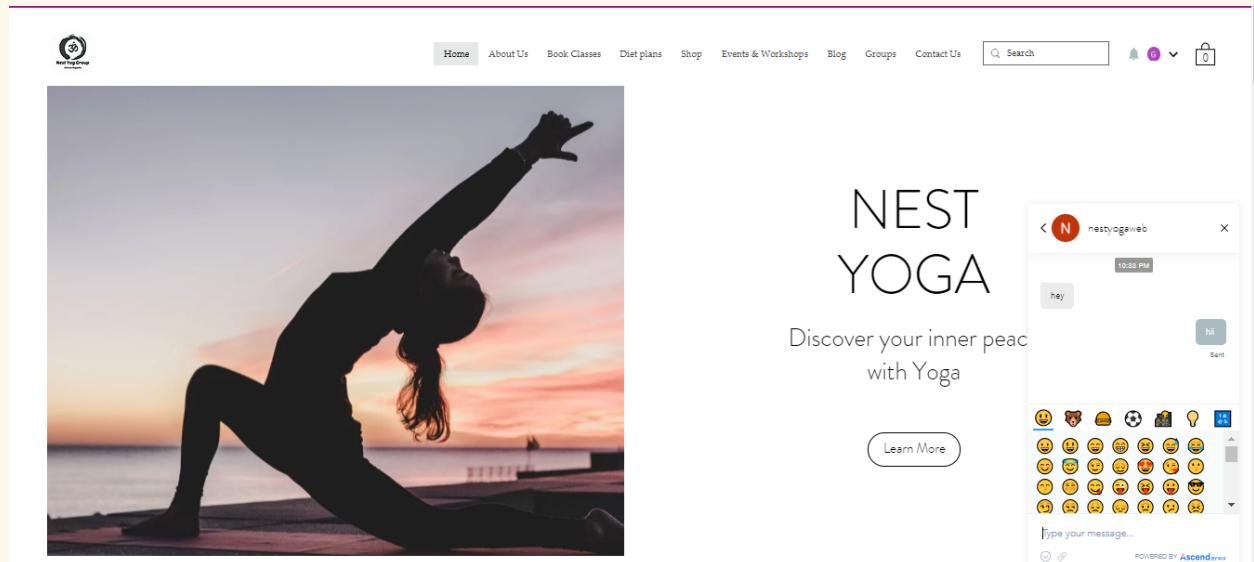

The screenshot shows a website for "NEST YOGA". The main content features a large image of a person performing a yoga pose against a sunset background. To the right, there is a sidebar titled "Members Chat" which lists two previous conversations: "Nest Yoga" and "nestyogaweb". Below the sidebar, a call-to-action button says "Learn More".

The users can start a new chat by pressing the button 'New chat' and choose the member they want to chat with.

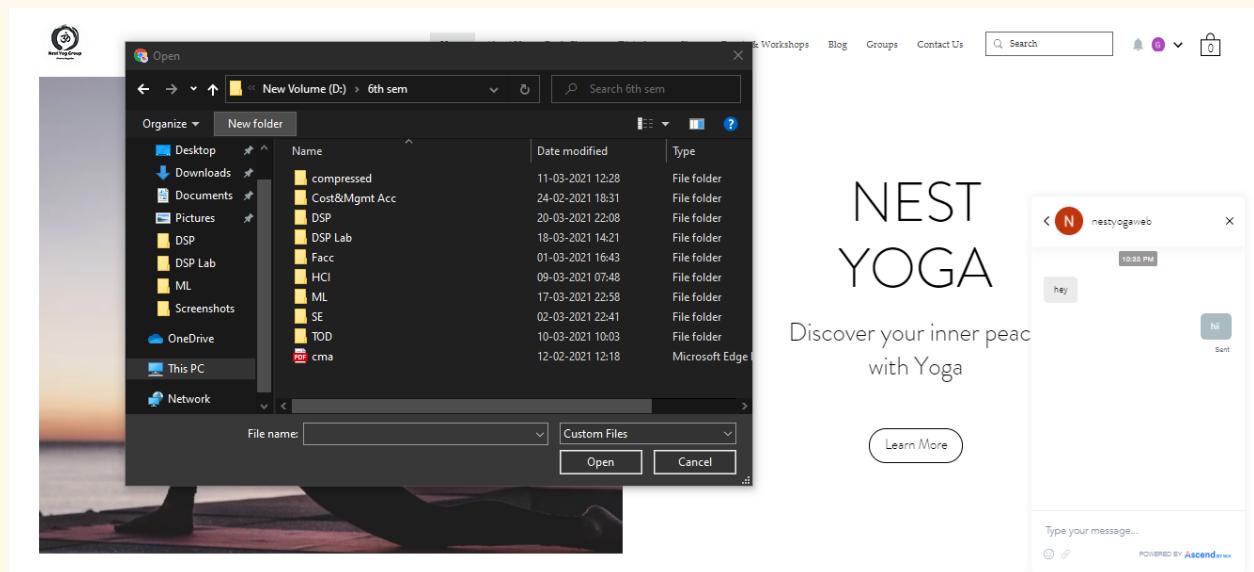

The screenshot shows the same website interface as above, but the "Members Chat" sidebar has been replaced by a "New Chat" sidebar. This sidebar includes a search bar labeled "Search for a member...", a "New Group Chat" option, and a list of five members: "Kesha Bagadia", "Manali Shah", "nestyogaweb", "priyavarma", and "yashvipate9092".

They can add emojis to their chat.

After clicking on the attachment button, dialog box of all the files on the computer will be shown. The user can then select any file and click on open and it will be sent to the other person.

After sending an image, it will be shown in the chat as well.

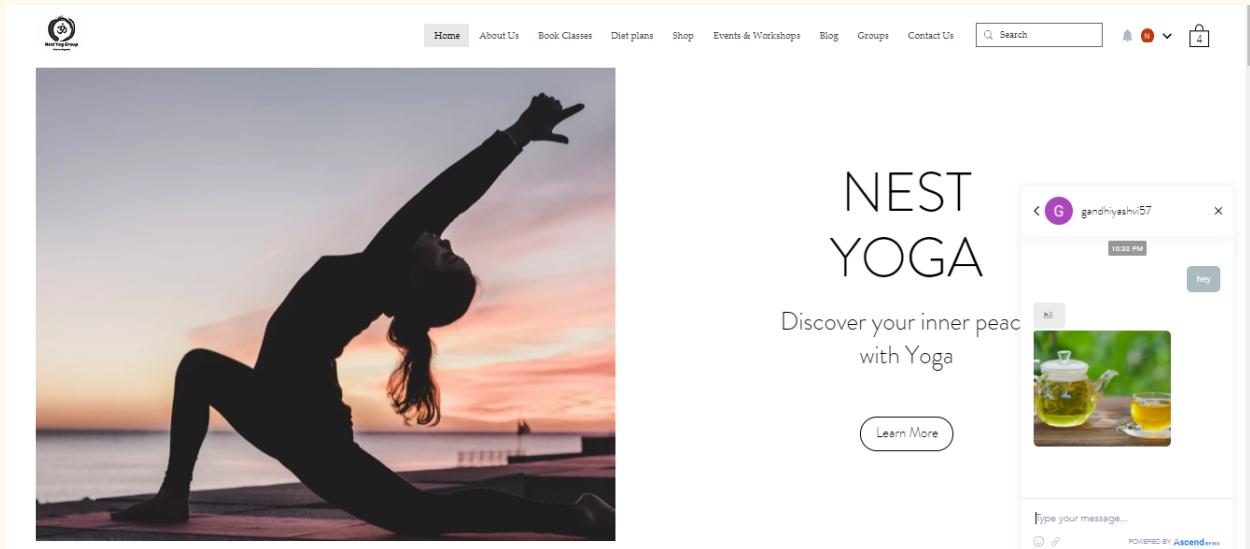

The screenshot shows a website header with navigation links: Home, About Us, Book Classes, Diet plans, Shop, Events & Workshops, Blog, Groups, Contact Us, and a search bar. To the right of the search bar are icons for notifications, user profile, and cart. Below the header is a large image of a woman in a yoga pose against a sunset background. To the right of the image is the text "NEST YOGA" and a subtext "Discover your inner peace with Yoga". A "Learn More" button is present. On the far right, there is a small inset showing a messaging interface between two users, with one message being sent.

Screenshot of the receiver's (nest yoga) side who received the notification of the new message.

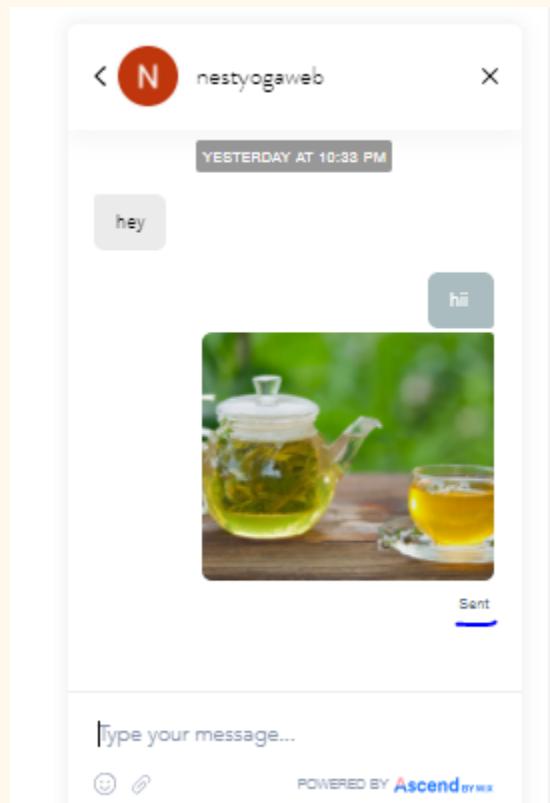

The screenshot shows a website header with navigation links: Home, About Us, Book Classes, Diet plans, Shop, Events & Workshops, Blog, Groups, Contact Us, and a search bar. To the right of the search bar are icons for notifications, user profile, and cart. Below the header is a large image of a woman in a yoga pose against a sunset background. To the right of the image is the text "NEST YOGA" and a subtext "Discover your inner peace with Yoga". A "Learn More" button is present. On the far right, there is a "Members Chat" window showing a conversation between two users, with one message being sent.

Image received on the receiver's side.

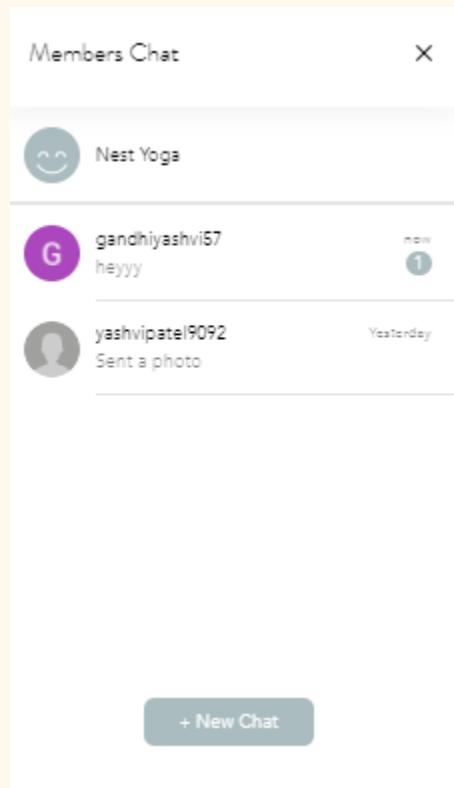

### III. Design Principles implemented:

- ❖ Informative user feedback:
  - When the sender sends his message, if the message has been sent, then it will show 'sent' written under the test so that the sender understands that the message has been sent successfully.

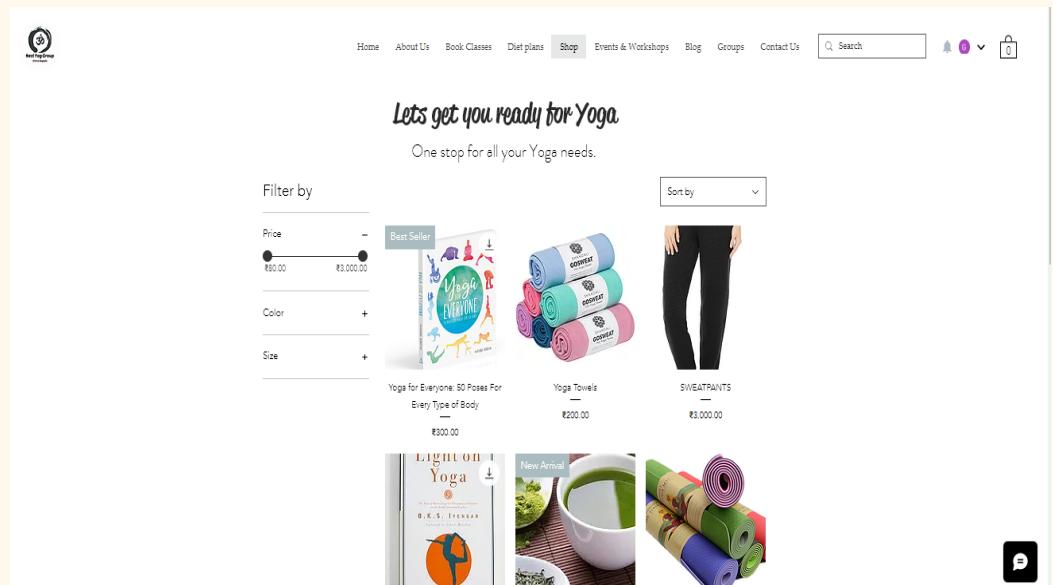

- And if the receiver has received his message, the notification will be there on his page.

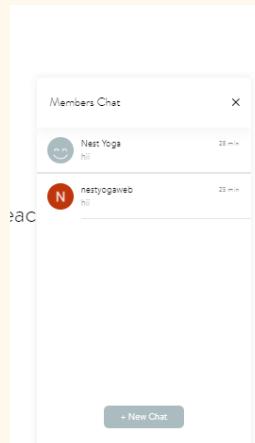

❖ Consistency :

- The feature of chat is available on all the pages of the website. Thus the user can chat from any of the pages. Thus consistency principle is applied in terms of availability of the feature.
  
- E.g. Shopping page

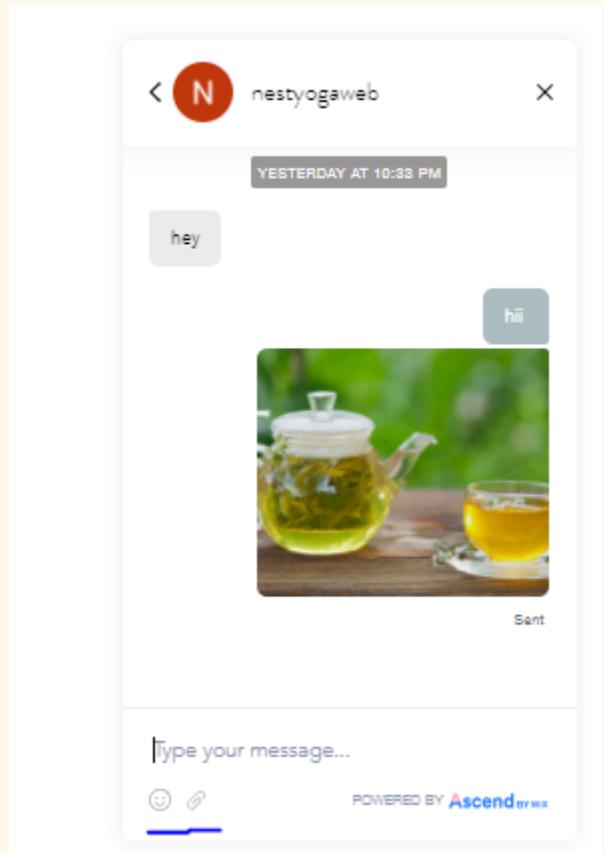

❖ Reduce short term memory load:

- The chat box shows the previous chats of the user. So if they want to continue their talk they can just click on the chat with the required person. Or else they can start a new chat as well. Thus the user doesn't need to remember all the names of the people with whom they had a talk earlier or the content/topic of the chat. They are easily available in the chat box.

❖ Visibility :

- All the options/ features are clearly visible and hence it becomes easy for the user to find their next option they are looking for from the chat box.

❖ Affordance :

- All the icons on the chat box are easily understandable and guides to their functionality so that it is very easy for the user to take any actions.

#### IV. Universal usability principles implemented :

❖ Personality difference :
